## Education

Prairie View A&M University, Prairie View, TX                          Expected December 2024
Master of Science in Computer Information Systems                    GPA 4.0

Nnamdi Azikiwe University, Awka, Nigeria                               Graduated 2019
Bachelor of Science in Geology                                        GPA 3.3

*Relevant Courses:* Information Technology, IT Research Methods, Computer Science 2

## Technical Projects

JPMorgan Chase & Co. Data for Good Hackathon                          April 2023
- Analyzed and interpreted large data sets. Analysis was used to recommend solutions that will help a non-profit organization (SWT) to gain better insight on how to improve wellness and liberation of people living in Washington DC.
- Methodology included data cleaning and filtering, descriptive and inferential statistics, and data visualization.

Budget App                                                            October 2022
- Developed a mobile web application for managing budgets. It contained a list of transactions associated with a category that shows how much was spent and what it was spent on.
- Utilized Ruby on Rails, UML Schema Diagram, Bootstrap, PostgreSQL, Rubocop, RSpec.

Crypto Metrics Webapp                                                 July 2022
- Developed a web application with two pages "Home Page" and "Details Page" used to check a list of crypto metrics and details about each crypto coin.
- Built the application using ReactJS, Git, Gitflow, Routers, APIs, Redux Toolkit.

## Work Experience

Microverse                                                            San Francisco, CA
Code Reviewer                                                         July 2022 – January 2023
- Increased developers' source codes by at least 80% by conducting methodological assessment and quality assurance of codebase designed to identify bugs and increase code quality.
- Proposed changes to 500+ pull requests to ensure project requirements and repository guidelines were met.

International School of Ministry                                       Lagos, Nigeria
IT Personnel                                                          July 2020 – February 2022
- Eliminated 90% of paperwork and 15 work hours needed per week by re-engineering the organization's financial records by initiating and implementing the use of Sage accounting software.
- Won most supportive staff award for three quarters in a year.

## Training

Microverse                                                            San Francisco, CA
Remote Full Stack Web Development Program                            April 2022 – November 2022
- Spent 1300+ hours mastering algorithms, data structures, and full-stack development, while simultaneously developing projects with Ruby, Rails, JavaScript, React and Redux.
- Developed skills in remote pair-programming using GitHub, industry standing git-flow, and daily standups to communicate and collaborate with international developers.

## Organizations and Competitions

NSBE (National Society of Black Engineers)                            March 2022 – Present
JP Morgan Chase & Co. Hackathon                                       April 2023
